

**The College of Intellectual Inspiration
Summer Quarter—July and August 2018**

The College of Intellectual Inspiration (CII) is a program of lifelong learning opportunities available in the Judson Park Community since 2016.

The quarterly schedule of classes and lectures is made possible through the generous contributions of anonymous donors.

The lectures and course subjects are selected by a resident advisory committee with input from resident surveys. All presentations feature expert speakers and instructors who can present a college level challenge for our residents.

The College of Intellectual Inspiration was recently granted The 2018 Community Service Award by Leading Age of Washington for its achievements. This award is given to an organization that has demonstrated outstanding commitment and benefit to meeting the overall mission and the goals of the community.

"At this time in my life, I seldom have such an opportunity. I wouldn't have missed it." – About Study of Shakespeare's Twelfth Night

"CII is wonderful for us who enjoy learning about different topics. Thank you!"

"I love learning! It's good to know I am still teachable!"

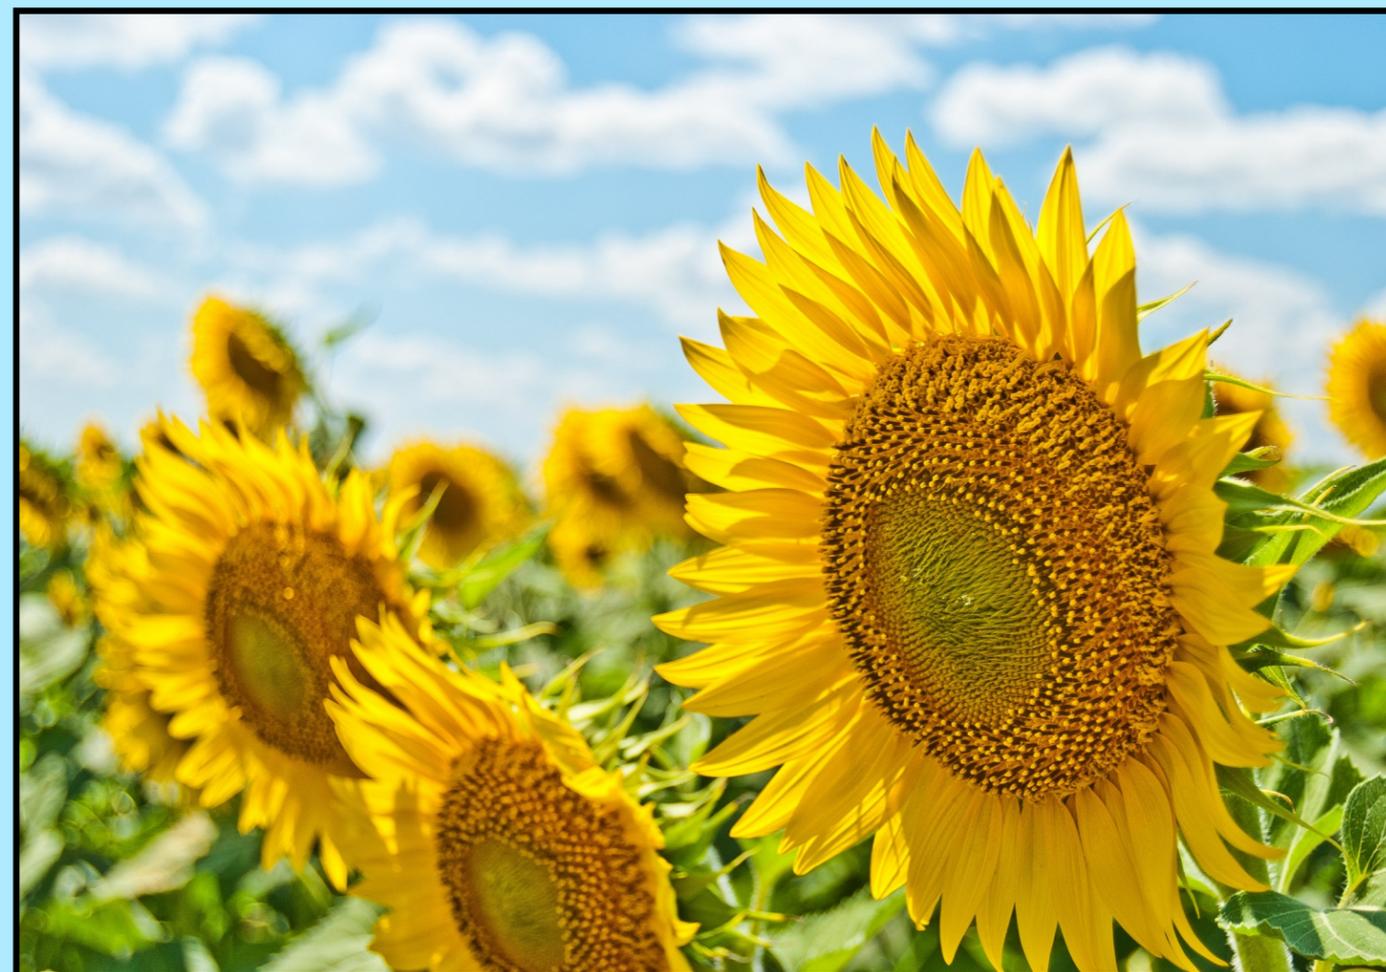

"This is a tremendous program. I wish there was more time in the day or week. You do a wonderful job!"

Class Registration

If you would like to attend a CII class and are not a resident of Judson Park Retirement Community, please call the receptionist at the Front Desk 206-824-4000 to reserve a space.

Summer Schedule Classes and Lectures July and August 2018

CII Lectures By Topic-Summer 2018

July and August

Note: All Classes are held in the Rainier Chapel unless specified otherwise

MUSIC

"Listening to Rap"

In celebration of the release of Dr. Berry's book, we will explore different ways of listening to Rap music and what we can learn by listening thoughtfully.

Monday, July 16, 3:00 PM—Michael Berry, UW

Seattle's 100th Anniversary Tribute to Leonard Bernstein

You know him as a conductor, a composer, and a pianist, but we'll look deeper into his life to explore things that make Bernstein a truly unique figure in 20th century music.

Monday, August 13, 3:00 PM—Michael Berry, UW

POLITICAL SCIENCE

Current Events

Political and economic topics in local, national, and international affairs

SCIENCE

Walking Through an Ocean of Trees

Phytoplankton, the myriad of single-celled oceanic microbes, produce over half the oxygen we breathe. But a small percentage of these marine organisms can produce toxins that affect the safety of the seafood we consume. How are we sure that our seafood is safe? Learn how scientists and volunteers monitor harmful algal blooms to protect public health. Try your hand at identifying the myriad phytoplankton in our local waters.

Thursday, July 12 at 2:00 PM — Vera Trainer, NOAA

The Solar System: Sun, Planets, Moons, Asteroids & Comets

In our lifetimes, more has been discovered about planets and smaller bodies that orbit our sun than during all of previous human history. This tour of the solar system reveals the fascinating variety and differences among these amazing worlds that orbit our sun.

Thursday, August 2 at 2:00 PM—Dana Rush, Green River College

Coming: Fall Quarter 2018

September, October, November
